EDUCATION

Indira Gandhi Delhi Technical University for Women (IGDTUW)

2023 - 2027

B.Tech in Electronics and Communication Engineering, specializing in Artificial Intelligence

CGPA: 8.61

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS

AI & ML: Machine Learning, Computer Vision, OpenCV, Large Language Models (LLM), Generative AI, Prompt Engineering, NLP

Frameworks & Libraries: React, FastAPI, Node.js, REST APIs, Flutter, Streamlit

Databases & Cloud: SQLite, MySQL, Firebase, AWS

Tools & CS Fundamentals: Git, GitHub, DSA, OOP, DBMS

EXPERIENCE

Accenture

Bengaluru, India

Associate Software Engineer Intern

May 2026 - Jul 2026

- Engineered a Python QA automation framework running 16 validation checks across 11 brands, pairing HTML/PDF parsing with multi-signal image matching (template matching, perceptual hashing, color/shape analysis).
- Cut banner review time from minutes to 5-10s by building a LangChain/Ollama QA agent for automated PASS/FAIL/SKIP execution and downloadable reports via a Streamlit UI.

5G India Forum (COAI)

Remote

Research Intern

Jan 2026 - Mar 2026

- Analyzed LLM inference traffic under Ericsson mentorship, capturing packet-level data via Wireshark to compare burst behavior, TTFT, and inter-packet delays across LLM, streaming, and file-transfer traffic.
- Found that prefill-phase (TTFT) latency drove most end-to-end delay and proposed a Python-based automated capture framework for higher timestamp precision.

Mutual Node Private Limited

Gurugram, India

Mobile App Developer Intern

Jun 2025 - Jul 2025

- Designed and launched an Android app on Google Play Store targeting an audience of 50k+ users, with background audio playback, voice search (70%+ accuracy), and real-time Firebase Firestore sync.

PROJECTS

ShelfMind: AI Shelf Monitoring | Python, FastAPI, YOLO11, OpenCV, React, SQLite

- Developed a full-stack shelf-monitoring platform (React, FastAPI, SQLite) around a YOLO11 model fine-tuned on SKU-110K (0.91 precision, 0.89 mAP50 at ~92 FPS), with a health-scoring engine, an 18-endpoint REST API, and a LangChain/Ollama AI assistant.

VisualFind: Visual Product Search | Python, FastAPI, React, TypeScript, SerpApi, SQLite

- Created a visual product search platform that identifies items via Google Lens and returns live prices from 11 retailers through a 7-tier price-extraction pipeline with domain allowlisting as an anti-scam layer.
- Added a Gemini-powered shopping assistant with a 12-signal ranking engine for personalized recommendations.

FinGuard | Python, TypeScript, FastAPI, React, Scikit-learn

- Architected a fraud-ops platform on 590K+ IEEE-CIS transactions with a payment risk-scoring model (ROC-AUC 0.91) driving threshold-based alerts, analyst investigations, and drift monitoring via Population Stability Index.

ACHIEVEMENTS

- Flipkart (2025):** Selected Top 100 of 45,000+ for Flipkart Runway; National Semifinalist in Flipkart GRiD 7.0 out of 160,000+ applicants.
- WISE Scholarship (2024):** Ranked top 15,000+ applicants for TalentSprint's WISE Program; awarded an 80% merit-based scholarship.
- InnoVortex Hackathon (2023):** Led team to a top-15 finish of 100+ teams, building a Microsoft Azure-supported travel itinerary system.

LEADERSHIP EXPERIENCE & CERTIFICATIONS

- Deloitte Australia - Data Analytics (2026):** Forensic data analysis and Tableau dashboard development for business insight reporting in Excel.
- Oracle OCI Generative AI & Agentic AI Foundations Associate (2026):** Certified in LLMs, RAG, Prompt Engineering, and Agentic AI Development.
- Python & Machine Learning - Anveshan Foundation, IGDTUW (2025):** Completed a 6-week ML internship.
- Minerva Outreachy:** Hosted and coordinated outreach events for 150+ students.
- Mentor - Summer Skill Sprint (2025):** Led a mentorship program in DSA using Java for 50+ students.
